TESTIMONIALS FROM OUR TEAM

ANDY LOW: Since joining Redstone in 2014 I have steadily moved through the ranks until running the two UK based teams; Commodities and Private Banking. I have travelled across the EMEA region developing clients and counterparties for both teams and have greatly enjoying overseeing the development and training of the excellent individuals representing both Redstone teams. We have worked hard to build a strong team ethos and culture of success at Redstone – our counterparties come back to us time and again because of the efficient professionalism we exhibit in placing strong individuals and teams.

ARYEH BRAWER: I joined Redstone in 2014 as a cross commodity consultant and have since focused on building our global coverage of the agriculture and chemicals supply chain. Since my first day, I have always felt like a member of a tightly-knit family and I owe a lot of my growth and success to our collaborative working culture and strong emphasis on mentorship. We constantly strive to provide new opportunities and avenues for career development at Redstone. Three years after joining in London, I was asked to set up a new office in paradise – Miami Beach – to further expand our footprint in the Americas. I'm loving it!

SAM FOWLER: I joined Redstone Search Group in January 2016. My role within the team was full on from day one, we had the aim to establish a Private Banking and Wealth management offering to compete with and complement our Commodity business. Since 2016 we have seen great traction in the expansion of our client base and I am now heading up the division. We are building out a thriving and hungry team to further expand our ability to place high level professionals across the Global Private Banking and Wealth Management hubs. Redstone offers the perfect balance between a traditional corporate environment and a place to demonstrate one's entrepreneurial side whilst being supported by a knowledgeable and motivating senior team. Plus, the commission is great.

KAMRAN SUBHERWAL: I had two clear objectives when joining Redstone, firstly, increase the size of my payslips, secondly, develop a collaborative team atmosphere with everyone moving towards the same objective – company expansion! The initial training scheme was perfectly set up and delivered results quickly, I am happy to say that my initial objectives were quickly achieved and can add that it is my delight to run the commodities desk. The top to bottom structure at Redstone sets out to provide an environment that values all team members, promotes healthy competition and provides a plethora of motivational perks which serve to build the strong work ethic and morale here at Redstone. We have all the necessary tools and support structures in place to ensure Redstone continues to thrive and grow in today's commodities recruitment markets.

THOMAS CARSON: I joined Redstone as a trainee and through the great training process run by the Directors, I became an Energy Consultant and have helped to develop our international coverage within the Oil and Gas markets. It is a great working environment and as Redstone's appointed Global Head of Fun, I should say that once a month we have a companywide team activity that has included rock climbing, Go-Ape, go-karting and even white-water rafting! I'm excited as the company continues to grow and open new opportunities for my career, recently I was asked to head up a new division for Redstone – Redstone Risk and Compliance. This area was a natural fit to me given the type of business I was doing in Commodities and it was very rewarding to have my hard work, (with a lot of team help as well) rewarded. It was especially rewarding as the company has continued to increase investment in my project throughout the Covid-19 Pandemic. At a time when many other companies withdrew or paused their growth plans, Redstone have remained active and strong to ensure continued success long into the future.

WE LOOK FORWARD TO MEETING YOU
